

Spreader King™ Microbial NPK + Te Belt Spreader Blend

KEY POINTS

- Rebuilds tired and worn soils through remineralization
 - Builds critical levels of many trace elements
 - Increases soil carbon levels for energy, water and nutrient holding capacity
 - Increases the ability for plants & turf to resist pest and disease attack
 - Greater biological activity in the soil promotes availability of both target and other tied-up nutrients in the soil
 - Economic alternative at 50% the cost of conventional nitrogen based fertilisers used for spreading
- *Improved soil health reduces input costs through efficiency.**

ACTIVATED RESPONSE

Microbial NPK + Te Belt Spreader Blend successfully combined with Pro-Tech Stimulate, containing active bacteria to carry mineral trace elements from plant surfaces into plant tissues. Added Trichoderma Harzianum, Trichoderma Lignorum, Trichoderma Koningii, Bacillus Subtilis, Kelp, Fish Amoltions & Carbon Fulvic Humates, all of which are key ingredients of high quality fertilisers. Applications at specific plant growth stages, can be used as a production tool for maximizing the plants productive capacity. This blend has been delicately handled to ensure the full benefit of a nutrition catalyst to enhance ion transfer and their enhancement of cell wall permeability.

INGREDIENTS

50% Urea and 50% combination of high analysis NPK inputs, Microbial Phosphate, Pro-Gypsum, Carbon Mineral Te, Pro-Lime, Pro-Dolomite & traces of micro-nutrients.

FUNDAMENTAL NUTRIENTS & TRACE ELEMENTS

N, P, K, S, C, Ca, Mg, Cu, Zn, Mn, Fe, B, Mo, Co & Si.

STORAGE STABILITY

Spreader King is a reclaimed product and there is no representation to its effectiveness. Spreader King generally consists of 0-12mm fractured granules. We recommend to use this product in a timely manner as it can be affected by environmental factors and can absorb moisture. Any risk can be offset by only ordering when you are immediately ready to apply this product. This product is not recommended for silo storage. Spreader King contains a variety of sweepings and is an ungraded product with moisture content as it comes. Spreader King is not subject to any analysis or quality control and may contain impurities. Spreader King is not tested as it is an untestable product as its composition cannot be accurately tested in batches.

Spreader King™ Microbial NPK + Te Belt Spreader Blend

PRODUCT SPECIFICATIONS

Fine to medium granule 0-12mm

QUANTITY SIZES (PER 1000KG)

Loose Bulk • 1t Bulk Bags

APPLICATION GUIDE

Application rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a qualified Fertpro consultant for assistance.

Best applied broadcast by belt spreader.

Application: 250-500kg/hectare

Compatibility: Check with a Fertpro qualified consultant prior to blending this product with other fertilisers.

Note: This blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop.

DISCLAIMER

FertPro Manufacturing Pty Ltd provides this information & application document as a guide and reference point for fertiliser application qualified professionals. This document needs to be supported by the means of soil tests and or leaf tests for a qualified professional to decide on application rate. FertPro Manufacturing P/L accept no responsibility or liability for the validity of testing, application of fertiliser or crop response as an outcome from information provided. It is the responsibility of each farming operation to keep our environment safe and clean for all generations. Use qualified advice, stringent planning and ownership of your decision before acting on any information provided.
