

Urea as Colour King

KEY POINTS

- Less loss of nitrogen
- C-K-U secures nitrogen within the soil reduces volatilization and leaching by
- 30 % of standard urea
- C-K-U Unique polymer coating is fluoro pink in colour Illuminating visibility of fertiliser products to ensures even application.

STORAGE STABILITY

C-K-U unique coating increases product storage & stability.

TYPICAL ANALYSIS (w/w)

Nitrogen Total (N)	46%
Controlled release	100%
Nitrogen as Colour King™	46%

PRODUCT SPECIFICATIONS

Colour Coated Controlled SLOW Release Granules 2-4mm

QUANTITY SIZES (PER 1000KG)

Loose Bulk • 1t Bulk Bags • 25kg Bags • 20kg Bags

Urea as Colour King

APPLICATION GUIDE

Application rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a qualified Fertpro consultant for assistance.

Best applied broadcast or direct drill, using horticultural spinner spreaders, belt spreaders or small walk behind applicators.

Compatibility: Check with a Fertpro qualified consultant prior to blending this product with other fertilisers.

Note: This blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop.

Carbon Coated Urea Coated Slow Release Granule
