

## Lime Belt Spreader Blend

### KEY POINTS

- Rebuilds tired and worn soils through remineralisation
- Builds critical levels of many trace elements
- Increases soil carbon levels for energy, water and nutrient holding capacity
- Increases the ability for plants & turf to resist pest and disease attack
- Greater biological activity in the soil promotes availability of both target and other tied-up nutrients in the soil

### PRODUCT

Natural Lime extracted with precision and fine ground. Uniquely prilled and screened for ease of use in conditioning soil. Precision Manufactured to ensure the full benefit calcium in any soil conditioning operation.

### TYPICAL ANALYSIS (w/w)

Calcium	34+%
---------	------

### PRODUCT SPECIFICATIONS

Fine to medium granule 1-12mm

### QUANTITY SIZES (PER 1000KG)

Loose Bulk • 1t Bulk Bags

Manufactured by FertPro Manufacturing Pty Ltd  
66 Chum Street, New Chum, QLD 4303

## Lime Belt Spreader Blend

### APPLICATION GUIDE

Application rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a qualified Fertpro consultant for assistance.

Best applied broadcast by belt spreader.

Recommendation: 500-1000kg/hectare

Compatibility: Check with a Fertpro qualified consultant prior to blending this product with other fertilisers.

Note: This blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop.

Granular Lime; Natural Lime mined, crushed and ground, then uniquely granulated/prilled to form the base to soil amendments.

### DISCLAIMER

FertPro Manufacturing Pty Ltd provides this information & application document as a guide and reference point for fertiliser application qualified professionals. This document needs to be supported by the means of soil tests and or leaf tests for a qualified professional to decide on application rate. FertPro Manufacturing P/L accept no responsibility or liability for the validity of testing, application of fertilizer or crop response as an outcome from information provided.
