

## Microbial NPK + Te Spreader Blend

### KEY POINTS

- Rebuilds tired and worn soils through remineralization
- Builds critical levels of many trace elements
- Increases soil carbon levels for energy, water and nutrient holding capacity
- Increases the ability for plants & turf to resist pest and disease attack
- Greater biological activity in the soil promotes availability of both target and other tied-up nutrients in the soil

**\*Improved soil health reduces input costs through efficiency.**

### ACTIVATED RESPONSE

Microbial NPK + Te Spreader Blend successfully combined with Pro-Tech Stimulate, containing active bacteria to carry mineral trace elements from plant surfaces into plant tissues. Added Trichoderma Harzianum, Trichoderma Lignorum, Trichoderma Koningii, Bacillus Subtilis, Kelp, Fish Amoltions & Carbon Fulvic Humates, all of which are key ingredients of high quality fertilisers. Applications at specific plant growth stages, can be used as a production tool for maximizing the plants productive capacity. This blend has been delicately handled to ensure the full benefit of a nutrition catalyst to enhance ion transfer and their enhancement of cell wall permeability.

### TYPICAL ANALYSIS (W/W)

Nitrogen 20> + %

Manufactured by FertPro Manufacturing Pty Ltd

## Microbial NPK + Te Spreader Blend

50% Urea and a combination of high analysis NPK inputs, Pro-Phosphate, Pro-Gypsum, Carbon Mineral Te, Pro-Lime, Pro-Dolomite and traces of micronutrients.

### PRODUCT SPECIFICATIONS

Fine to medium granule 1-12mm

### QUANTITY SIZES (PER 1000KG)

Loose Bulk • 1t Bulk Bags

### APPLICATION GUIDE

Application rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a qualified Fertpro consultant for assistance.

Best applied broadcast by belt spreader.

Application: 500-1000kg/hectare

Compatibility: Check with a Fertpro qualified consultant prior to blending this product with other fertilisers.

Note: This blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop.

### DISCLAIMER

FertPro Manufacturing Pty Ltd provides this information & application document as a guide and reference point for fertiliser application qualified professionals. This document needs to be supported by the means of soil tests and or leaf tests for a qualified professional to decide on application rate. FertPro Manufacturing P/L accept no responsibility or liability for the validity of testing, application of fertiliser or crop response as an outcome from information provided. It is the responsibility of each farming operation to keep our environment safe and clean for all generations. Use qualified advice, stringent planning and ownership of your decision before acting on any information provided.
