APPLICATION GUIDE

Application Rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a Fertpro Qualified Consultant for assistance.

Evergreen is best applied broadcast, Direct Drill Horticultural Spinner Spreaders and small walk behind Applicators.

Application Rates: 4 kg /100 m²

Compatibility: Check with a Fertpro Qualified Consultant prior to blending this product with other fertilisers

Note; This Blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop

FertPro Manufacturing Pty Ltd provides this information & application document as a guide and reference point for fertiliser application Qualified Professionals. This document needs to be supported by the means of soil tests and or leaf tests for a Qualified Professional to decide on application rate. FertPro Manufacturing P/L accept no responsibility or liability for the validity of testing, application of fertilizer or crop response as an outcome from information provided. It is the responsibility of each farming operation to keep our environment safe and clean for all generations. Use qualified advice, stringent planning and ownership of your decision before acting on any information provided.
