KEY POINTS

- Rebuilds tired and worn soils through remineralisation
- Builds critical levels of many trace elements
- Increases soil carbon levels for energy, water and nutrient holding capacity
- Increases the ability for Plants & turf to resist pest and disease attack
- Greater biological activity in the soil promotes availability of both target and other tied-up nutrients in the soil

Improved Soil Health reduces input costs through efficiency.

ACTIVATED RESPONSE

AcTe Neem has been used as a fertiliser and wetter in fertiliser for centuries. AcTe Neem is pure Neem Oil mixed with trace elements, organic humates carefully blended to be mixed with water or fertilisers. Ideal enhancer to plant health, as a soil drench for soil conditioning or as a fertiliser in your farm plan. Neem being a totally botanical product it contains natural NPK content and other essential micro nutrients. The active in neem oil, azadirachtin, may deter insects and pests in different ways. Neem oil seems to have the opposite effect by encouraging earthworm activity.

TYPICAL ANALYSIS (w/v)

Nitrogen	1.54 %	Zinc	8493mg/L
Phosphorous	0.01 %	Manganese	5343mg/L
Potassium	0.04 %	Iron	8471mg/L
Sulphur	1.71 %	Boron	2060mg/L
Carbon	55.6 %	Molybdenum	96.7mg/L
Calcium	0.01 %	Cobalt	8.6mg/L
Magnesium	0.02 %	Silicon	<50mg/L
Copper	2883mg/L		

PRODUCT SPECIFICATIONS

Form: Liquid

pH: 2.5

Specific Gravity: 1.11

Application Rates: Dilution in water

1 – 100

5-7L/Ha

Manufactured by FertPro Manufacturing Pty Ltd

APPLICATION GUIDE

AGITATE BEFORE USE

Application Rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. **Contact a FertPro Qualified Consultant for assistance.**

AcTe Neem is best applied direct into soil at the seed zone or direct boom spray application, irrigation lines or horticultural spray applicators.

Compatibility: Check with Fertpro Qualified Consultant prior to blending this product with other fertilizer.

Note; This Blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop.

FertPro Manufacturing Pty Ltd provides this information & application document as a guide and reference point for fertiliser application Qualified Professionals. This document needs to be supported by the means of soil tests and or leaf tests for a Qualified Professional to decide on application rate. FertPro Manufacturing P/L accept no responsibility or liability for the validity of testing, application of fertilizer or crop response as an outcome from information provided. It is the responsibility of each farming operation to keep our environment safe and clean for all generations. Use qualified advice, stringent planning and ownership of your decision before acting on any information provided.
